Jan Jędrzejewski

Python / Backend Developer · ML Engineer · Data Scientist

M.Sc. in Computer Science graduate from WUT, specializing in Artificial Intelligence. Experienced Backend and Database Engineer, who actively builds and deploys Machine Learning models through personal projects. Seeking ambitious, innovation-driven ML/AI and Software Engineering roles.

SKILLS

Backend i API: Python, FastAPI, REST API, SOAP API, OOP, API integrations
Data / ML: PyTorch, TensorFlow, scikit-learn, XGBoost, Pandas, NumPy
Bazy danych: SQL, PL/SQL, bazy Oracle, Oracle EBS / APEX, ERD/UML, PostgreSQL
Chmura i DevOps: GCP, Firebase, Azure, Git, Jira, Agile
Pozostałe: C#, Java, JavaScript, React, Angular, Vite

EXPERIENCE

Dahliamatic Sp. z o.o. — *PL/SQL Developer* *2023-Now*

- Maintain Oracle E-Business Suite for 7 business clients, resolving **~90 tickets/month**.
- Designed and developed 40+ PL/SQL packages and procedures automating financial and accounting processes, including KSeF and JPK integrations, APEX applications.
- Implemented 70+ Oracle EBS reports, forms, and integrations (APEX, OAF, BI Publisher, Java).

Social Surfer — *Backend Developer* *2024-2025*

- Designed and developed a FastAPI backend (68 endpoints) and database architecture within Google Cloud and Firebase.
- Planned and executed a seamless database and infrastructure migration from Azure to Google.

AI-CCTV — *ML Engineer* *2022-2023*

- Recorded and annotated datasets consisting of 1,500+ videos across 13 distinct categories.
- Computer vision models for video scene recognition and anomaly detection, **86% accuracy**.

PROJECTS

Auto Value AI — *Automated Vehicle Valuation Platform*

- XGBoost valuation model trained on 180k listings, achieving a **MAPE of ±7.31%** on the test set.

Traffic Insights — *Traffic Analysis System*

- Developed a vehicle recognition model for real-time city camera feeds, delivering automated traffic density and flow analytics.

PitWallAI — *Formula 1 Race Predictor*

- Developed a Monte Carlo simulation engine that predicts Formula 1 race outcomes by running multi-iteration race simulations driven by official timing data.

EDUCATION

Warsaw University of Technology — *Master in Computer Science* *2020-2026*

- Faculty of Electronics and Information Technology, **spec. Artificial Intelligence.**
- Master's Thesis: ML in Vehicle Valuation - **7.31% MAPE, graduated with honors**.
- Engineer's Thesis: AI Models for Radar Object Recognition - **97% accuracy**.

Languages: English C1 (working proficiency) · Polish native
